

Design Leadership for Business Growth

I'm Jacob Medley, a UX/UI designer and digital strategist. Throughout my career, I have consistently delivered business results through design and systems thinking. By cultivating strong partnerships with executive leadership and cross-functional teams, I have directly contributed to business growth, cost reduction, and rapid product launches with proven, measurable results—all while crafting a positive user experience.

Proficiencies & Notable Contributions

UX/UI Leadership: Unified design systems across digital ecosystems, leveraging pattern and component libraries.

Design Operations: Streamlined workflows and process management company-wide.

Strategic UX Roadmaps: Aligned product design and development with business goals and user needs.

Mentorship: Fostered junior designers' professional growth in design excellence.

Data-Informed Design: Leveraged quantitative and qualitative data to enhance user experiences.

Collaboration: Worked closely with designers, stakeholders, and engineers to solve problems and implement solutions.

Business Aware Design: Designed user experiences that blend data-driven insights to drive business outcomes.

SEO and Content Design: Strategically structured websites to enhance SEO and user engagement, optimizing platforms for search engines without compromising user experience.

Performance Optimization: Improved website speed, efficiency, and overall performance, focusing on funnel and conversion rate optimization (CRO) to drive user engagement and business outcomes.

Product Design for Marketing Technology: Developed proprietary marketing technology frameworks for e-commerce websites and demand generation.

Lead Designer for LLM Projects: Led the design of two AI-powered tools utilizing GPT and LLMs – a conversational chatbot for customer interaction and an intelligent search tool for customer service representatives to quickly search our knowledge base.

- Responsive design
- Accessibility Design
- Project Management
- Agile Workflows
- Writing User Stories & Acceptance Criteria
- Front-end development
- HTML and CSS
- Less and Sass
- Bootstrap Framework
- Wordpress Development

Experience

Senior User Experience Designer

Mutual of America Financial Group , Boca Raton, Florida
2023 to Current

At Mutual of America, I collaborate with stakeholders and cross-functional teams to identify and address key challenges. I lead strategic planning, conduct workshops, define Epics, and write user stories and acceptance criteria for the main website. I established best practices for A/B testing and planning. Additionally, as the lead UI designer on two GPT/LLM projects, I worked with teams to develop a conversational search application within Salesforce and the public website.

Director UX/UI & Design

One Park Financial, Coconut Grove, Florida
2021 to 2022

At One Park Financial, I oversaw and developed all design processes and workflows, establishing best practices for UX and UI design and usability testing. I collaborated with teams across marketing, product, and engineering, conducting workshops to drive problem-solving and innovation.

Partnering with Channel Managers specializing in PPC, SEO, and Affiliate marketing, I helped establish their conversion rate optimization strategies to maximize user engagement and conversion rates.

I evangelized the need for a design system, partnering with the SVP of Marketing to secure executive buy-in for the project. This led to the creation of the Hydra Design System, a unified pattern and component library. This empowered the company to design and engineer rapidly and "fail fast," improving business goals and user experience.

Sr. Manager of UX & UI Design

DentalPlans.com, Plantation, Florida
2015 to 2021

As the acting product owner, I managed a portfolio of brand-focused eCommerce marketplaces for dental savings plans. What began as an idea for a single product-focused site evolved into a robust framework supporting rapid product site deployment, a multi-brand design system, and microservices that drive significant business results.

This framework created value by enabling a small, lean team to manage several profitable eCommerce sites, scalable product features, and rapid launch-and-learn efforts, alongside conversion rate optimization. Our proprietary platform and systems, owned by the company, have been instrumental in achieving these outcomes.

Sr. Digital Designer

Bluegreen Corp., Boca Raton, Florida
2011 to 2015

As the design lead, I contributed to the company-wide transition to a data-driven omnichannel marketing platform, incorporating digital signage across 48 resort locations and interactive kiosk interfaces. This role involved crafting engaging user experiences across various marketing platforms and channels, ensuring a seamless integration of digital and physical touchpoints.
